EXPERIENCE

Apptware, Pune — *React Developer Intern*

July 2022 - Oct 2022

I was a React intern at Apptware, a rapidly expanding business. During my internship, I worked on a few minor personal projects as well as an Ecom website in React JS.

Certificate of internship :

Freelancing, Pune — *Frontend Developer*

Feb 2022 - Sep 2022

A freelancing project where we build a CMS for the placement committee of Government Law College, Mumbai. The major goal of the website is to display fresh job openings to make it easier for their pupils to recognise and apply for jobs as soon as possible. A dynamic CV builder has also been included to the website to allow students to easily write their CVs and apply for jobs in a matter of seconds.

2006 - 2016

Class 10th percent: 92%

PROJECTS

Placement committee of Government Law College, Mumbai
— A website for placement committee of Government Law College, Mumbai.

A Website for the placement committee of Government Law College, Mumbai. This is a freelancing project developed by a team of 3 people. The main purpose of this project is to keep students updated with job vacancies in Law firms registered with their college. We have also provided an admin dashboard through which the admin can alter the content visible on the user web page. We have basically built a Content management System along with a dynamic resume builder for the college. This website is deployed and is in production and is used by more than 10 thousand users daily.

Technologies Used : React, Zustand, Tailwind CSS, Axios, MongoDB, Python-Flask, Figma

Expense Tracker and Bill Splitter — *A fullstack app to track expenses and split bills among friends.*

The bill splitter and expense tracker app enables users to input and categorize expenses, split bills among multiple users, track owed amounts, and set up recurring expenses with bill reminders. It includes budget tracking, expense report exports, and the option to add notes or receipts to each expense entry.

Technologies Used : React, Redux-Toolkit, Redux, Tailwind CSS, Axios, MongoDB, Python-Flask

Github Link : https://github.com/SrushtiSalvi/bill-splitter-flask-react-.git

React News App — *A News App which gives insights of everyday news.*

A web-based application that allows users to access news articles and other information from various news sources in a convenient and centralized location.Users can select the topics and sources that they are interested in, and the app will provide a customized feed of articles from those sources.

Technologies Used : React , Tailwind CSS, Axios, API
